

THE STEPLINE CARBORUNDUM RANGE

STEPLINE Carborundum discs and strips create a high slip resistant surface for increased safety on internal and external steps.

Available in **black, yellow and white** in a range of different dimensions to meet a wide variety of needs.

DIMENSIONS:

Thickness: 8mm

Available in widths:

SQUARE:

10mm, 15mm, 20mm, 25mm, 35mm or 55mm(w)

DISC:

25mm or 50mm(dia)

STEPLINE CARBORUNDUM SUBSTRATES

STEPLINE Carborundum is made with silicon carbide abrasive recognised for its high-temperature strength, low thermal expansion and resistance to chemical reaction.

It is suitable to be set into concrete and wood.

STEPLINE Original can be installed into preformed channels or the substrate can be routed out to create the channel for the insert to be installed.

The design is unobtrusive and aesthetically pleasing as no aluminium stair nosings are required.

See installation instructions for more details.
